

Elastic Storage Server (ESS) User Group Update

Doug Petteway – March 20, 2019

- IBM's statements regarding its plans, directions, and intent are subject to change or withdrawal without notice at IBM's sole discretion.
- Information regarding potential future products is intended to outline our general product direction and it should not be relied on in making a purchasing decision.
- The information mentioned regarding potential future products is not a commitment, promise, or legal obligation to deliver any material, code or functionality. Information about potential future products may not be incorporated into any contract. The development, release, and timing of any future features or functionality described for our products remains at our sole discretion.

- © 2018 International Business Machines Corporation. No part of this document may be reproduced or transmitted in any form without written permission from IBM.
- **U.S. Government Users Restricted Rights — use, duplication or disclosure restricted by GSA ADP Schedule Contract with IBM.**
- Information in these presentations (including information relating to products that have not yet been announced by IBM) has been reviewed for accuracy as of the date of initial publication and could include unintentional technical or typographical errors. IBM shall have no responsibility to update this information. **This document is distributed “as is” without any warranty, either express or implied. In no event, shall IBM be liable for any damage arising from the use of this information, including but not limited to, loss of data, business interruption, loss of profit or loss of opportunity.** IBM products and services are warranted per the terms and conditions of the agreements under which they are provided.
- IBM products are manufactured from new parts or new and used parts. In some cases, a product may not be new and may have been previously installed. Regardless, our warranty terms apply.”
- **Any statements regarding IBM's future direction, intent or product plans are subject to change or withdrawal without notice.**
- Performance data contained herein was generally obtained in a controlled, isolated environments. Customer examples are presented as illustrations of how those
- customers have used IBM products and the results they may have achieved. Actual performance, cost, savings or other results in other operating environments may vary.
- References in this document to IBM products, programs, or services does not imply that IBM intends to make such products, programs or services available in all countries in which IBM operates or does business.
- Workshops, sessions and associated materials may have been prepared by independent session speakers, and do not necessarily reflect the views of IBM. All materials and discussions are provided for informational purposes only, and are neither intended to, nor shall constitute legal or other guidance or advice to any individual participant or their specific situation.
- It is the customer's responsibility to insure its own compliance with legal requirements and to obtain advice of competent legal counsel as to the identification and interpretation of any relevant laws and regulatory requirements that may affect the customer's business and any actions the customer may need to take to comply with such laws. IBM does not provide legal advice or represent or warrant that its services or products will ensure that the customer follows any law.

- Information concerning non-IBM products was obtained from the suppliers of those products, their published announcements or other publicly available sources. IBM has not tested those products about this publication and cannot confirm the accuracy of performance, compatibility or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products. IBM does not warrant the quality of any third-party products, or the ability of any such third-party products to interoperate with IBM's products. **IBM expressly disclaims all warranties, expressed or implied, including but not limited to, the implied warranties of merchantability and fitness for a purpose.**
- The provision of the information contained herein is not intended to, and does not, grant any right or license under any IBM patents, copyrights, trademarks or other intellectual property right.
- IBM, the IBM logo, ibm.com and [names of other referenced IBM products and services used in the presentation] are trademarks of International Business Machines Corporation, registered in many jurisdictions worldwide. Other product and service names might be trademarks of IBM or other companies. A current list of IBM trademarks is available on the Web at "Copyright and trademark information" at: www.ibm.com/legal/copytrade.shtml.

Free! Introduction to IBM Elastic Storage Server and Spectrum Scale RAID

<https://www.onlinedigitallearning.com/course/view.php?id=2173> (Log on with your IBM ID)

The screenshot shows the IBM online learning interface. At the top, there are navigation links for "My Enrollments" and "My courses". Below these, the course ID "DL08003G" is displayed. The main content area is titled "Introducing the Elastic Storage Server". It includes a description of the IBM Elastic Storage Server, which is a big data storage system combining Power servers, storage enclosures, and disks along with IBM Spectrum Scale and IBM Spectrum Scale RAID technology. The course is labeled as "Basic", "30 Minutes", and "Self-paced". A "Launch" button is visible. On the left side, there is a sidebar with a "Navigation" menu containing "My Enrollments", "My courses" (with "DL08003G" selected), and "Support". Below the navigation menu, there is a "Self Completion" section stating "You have already completed this course". At the bottom of the sidebar, there is a "Course Completion Status" section.

Course Completion Status

Introducing the Elastic Storage Server

Basic | 30 Minutes | Self-paced

The IBM Elastic Storage Server is a big data storage system that combines Power servers, storage enclosures, and disks along with IBM Spectrum Scale and IBM Spectrum Scale RAID technology, providing analytic and technical computing storage and data services for elastic storage workloads.

Launch

Free! - IBM Elastic Storage Server and Spectrum Scale RAID - gssutils

gssutils simulation for SSR Tools sub-menu

[My Enrollments](#) / [My courses](#) / [DL08010G: SSR gssutils](#)

About

Simulation

This content is for installers or administrators for the IBM Elastic Storage Server.

You need 15 minutes or less to go through this content.

This simulation is for the **gssutils** tool that is pre-installed as part of the IBM Elastic Storage Server. The focus of this simulation is for the **SSR Tools** sub-menu to use in order to verify the installation of an ESS.

ESS INSTALLATION AND DEPLOYMENT TOOLKIT

1. Help
2. SSR Tools >
3. Plug n Play and Hybrid >
4. Install >
5. Upgrade >
6. Validation checks >
7. View/Collect service data (snaps) >
8. Exit

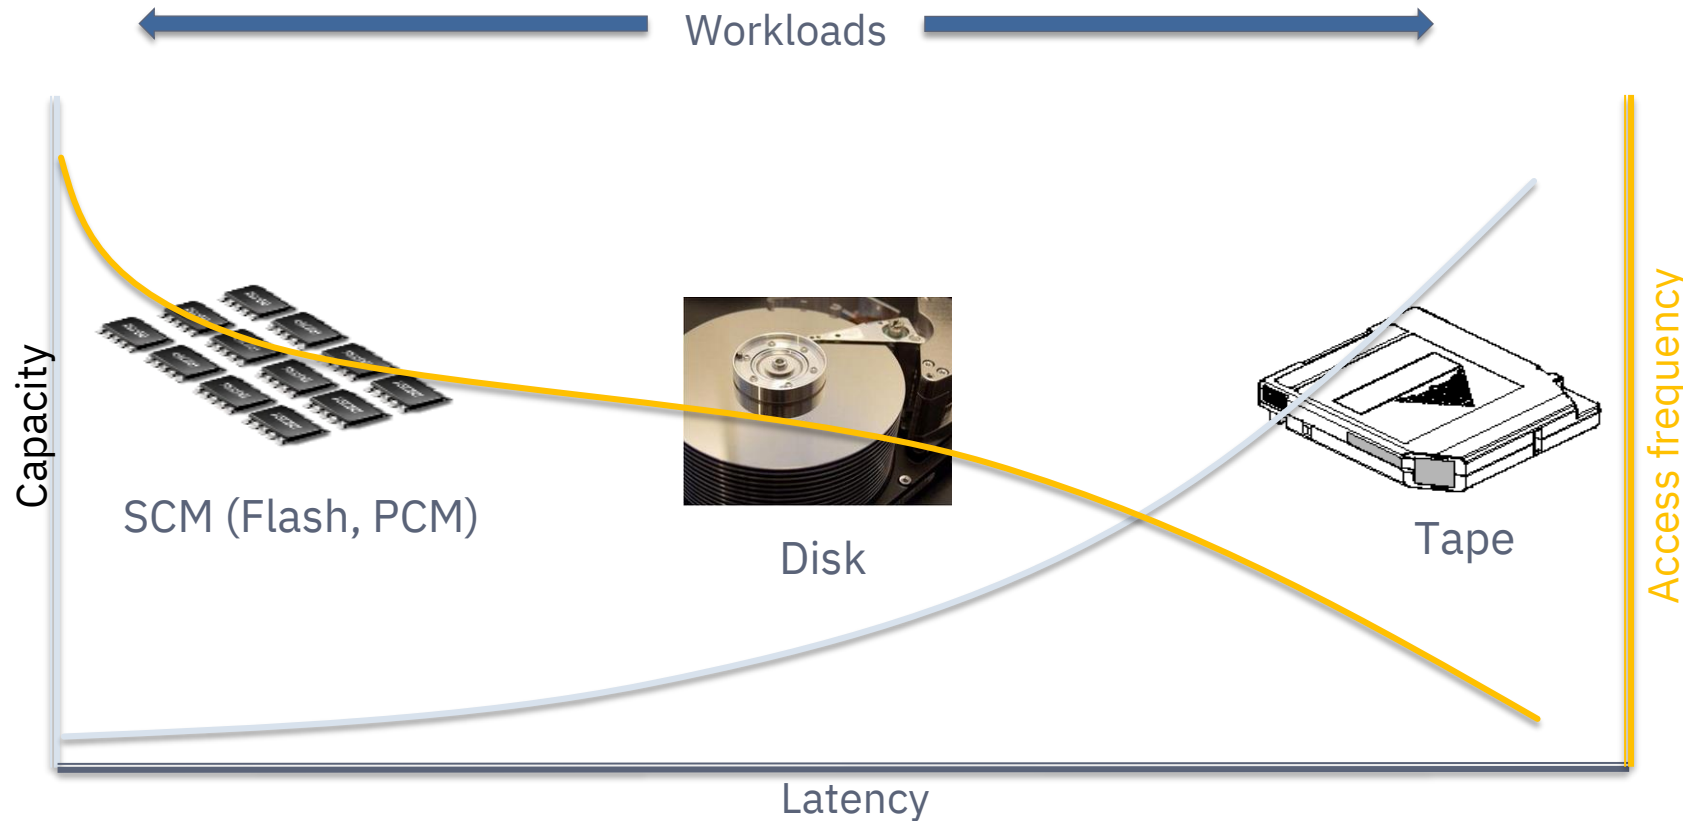

```
man gssutils_panel_1
Help
```

CHECK SYSTEM HARDWARE AND SOFTWARE

1. Help
2. Show node details
3. Check and validate various install parameters
4. Quick storage configuration check
5. Check enclosure cabling and paths to disks
6. Check disks for IO operations
7. Ping all nodes
8. Check ssh to all nodes
9. Run lsscsi from all nodes
10. Check for open serviceable events
11. Back

```
/opt/ibm/gss/tools/bin/gssnodedetails -N ems1,gss_ppc64
Shows miscellaneous node information.
```

Storage Options

90% of
data is never
touched after
90 days

When data gets

storage tier

IBM Spectrum Scale with Elastic Storage Server Family

The IBM ESS Family

Field proven, highly efficient
and super reliable

- Over **1000** ESS Installed
- Over **300** ESS customers
- Over **5,000** Spectrum Scale clients

Five 9's Reliability!

*IBM is the World Leader
in Software Defined
Storage Environments*

IBM Elastic Storage Server (ESS)

Integrated scale-out data management for file and object data

Optimal building block for high-performance, scalable, reliable enterprise Spectrum Scale storage

- Faster data access with choice to scale-up or out
- Easy to deploy clusters with unified system GUI
- Simplified storage administration with IBM Spectrum Control integration

One solution for all your Spectrum Scale data needs

- Single repository of data with unified file and object support
- Anywhere access with multi-protocol support: NFS 4.0, SMB, OpenStack Swift, Cinder, and Manila
- Ideal for Big Data Analytics with full Hadoop transparency

Ready for business critical data

- Disaster recovery with synchronous or asynchronous replication
- Ensure reliability and fast rebuild times using Spectrum Scale RAID's dispersed data and erasure code
- Five 99999s of availability

IBM Elastic Storage Server: Speed and Capacity

Speed

Model GL6S:
6 Enclosures, 28U
502 NL-SAS, 2 SSD

30+ GB/s

IBM - Leading the AI Challenge

#1: June 2018 - IBM and U.S. Department of Energy (DoE) unveil **“Summit”** the world’s most powerful and smartest AI scientific supercomputer

- Located at Oak Ridge National Laboratory (ORNL)
- Record breaking Performance, Throughput and Density

#2: 4Q18 - IBM and DoE also unveiled **“Sierra”** second only to Summit in scientific supercomputing

- Located at Lawrence Livermore National Laboratory (LLNL)

Tomorrow: Quantum Computing from IBM will set a new standard for Future Computing

Today: IBM has built the Worlds Smartest and Most Powerful AI Supercomputer

Summit: world's smartest, most powerful AI supercomputer

- 200 petaflops
for modeling & simulation
- 3.3 ExaOps
for data analytics and AI
- 2.5 TB/sec
single stream IOR
- 250 PB
HDD storage capacity

And getting Faster

<https://www.olcf.ornl.gov/summit/>

- Storage subsystem: IBM Elastic Storage Server (ESS) & IBM Spectrum Scale V5
- Compute Servers: IBM Power9 AC922 with Nvidia Tesla GPUs

IBM Elastic Storage Server 5.3.3 - GLxC models

Improved storage capacity and economy

New ESS GLxC models use denser enclosures to deliver up to **26% more capacity in 17% less rack space**

Model	4U106 drawers	Drives	Max Raw capacity	Software licenses
GL1C	1	104	1.45 PB	104
GL2C	2	210	2.94 PB	210
GL4C	4	432	6.04 PB	432
GL6C	6	634	8.87 PB	634
GL8C	8	846	11.8 PB	846

>70GB/sec**
>8PB of storage
>789TB per Rack Unit
Ultra-dense storage

*Compared to GLxS models

**Final Benchmarks to be published

Non-disruptive upgrades!

Simple expansion of Storage Capacity

- Spectrum Scale will automatically rebalance data in the background
- System automatically puts the new capacity to use
- No need to Archive & Restore data
- No System disruption*

Non Disruptive Upgrades	
From	To
GS1S	GS2S
GS2S	GS4S
GL1S	GL2S
GL2S	GL4S
GL4S	GL6S

Example

Model GS1S
With 24 SSDs

Install additional
drawer with 24 SSDs

Model GS2S
With 48 SSDs

***Requires space available in the rack**
