Development

**Wayne Sawdon**  
CTO for Spectrum Scale and ESS

IBM

# Strategic Trends

Connected Clouds

Dev Ops

Inescapable AI

Data Management Challenges

Security

Performance

Companies  
average almost

**5**

private and  
public clouds

**80%**

of companies  
moved their  
applications or  
data from public  
clouds in 2018

### Reasons to migrate from public cloud

- Security
- Performance
- Cost
- Control

*IDC Survey*

# Hybrid multicloud is the platform

**85%**

of companies  
operate in a  
hybrid multicloud  
environment today

**98%**

of companies  
will be hybrid  
multicloud  
in three years

**IBM**

Two simultaneous evolutions are taking shape in the data center today

1. Hybrid multicloud usage
2. Taking advantage of more data for competitive advantage

**IBM's ACQUISITION OF RED HAT IN JULY COMPLETELY CHANGED THE CLOUD LANDSCAPE TO BECOME THE WORLD'S #1 HYBRID MULTI-CLOUD PROVIDER.**

# The shift to containers

# Spectrum Scale Containers Models

## Storage for Containers

### Container Ready Storage

## Storage in Containers

### Cloud Native Storage

# Cloud Native Storage

Goal: Deliver High Performance File Services to Containerized Application Workloads

## Support Workloads that Require High Performance File Services

- Analytics & Cognitive
- High Performance Computing
- AI Data Pipeline

## Support the Workload Ecosystem in the Cloud

- Containerized Applications, Storage
- Ephemeral and Persistent Storage Volumes

## Flexible Deployment

- Dynamic Provisioning, Configuration, Upgrade

## Support for Multiple Clouds

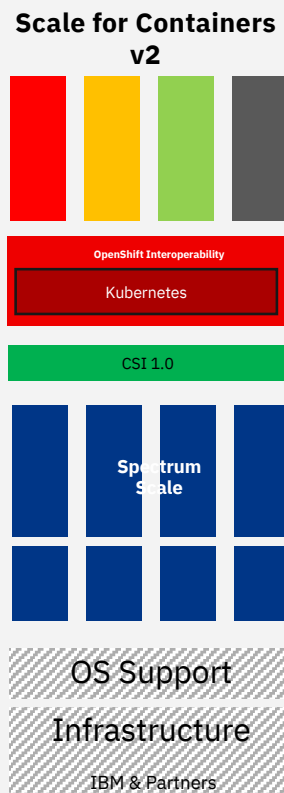

- Public, Private, Hybrid

## Support Hybrid Use Cases

- Cloud Burst – Single Name Space
- Multi Cloud Data Sharing
- Archive
- Data Accelerator (High Performance Tiering)

## Solution Integration (Partners)

# Evolution of IBM Spectrum Scale Containers

# Why DevOps?

Flexible Provisioning and Deployment

Consistency across On-Prem, Multi Cloud ,  
Hardware Solutions

Needs to be Highly Customizable

- Microservices
- Integrated with Workload
- Open Source

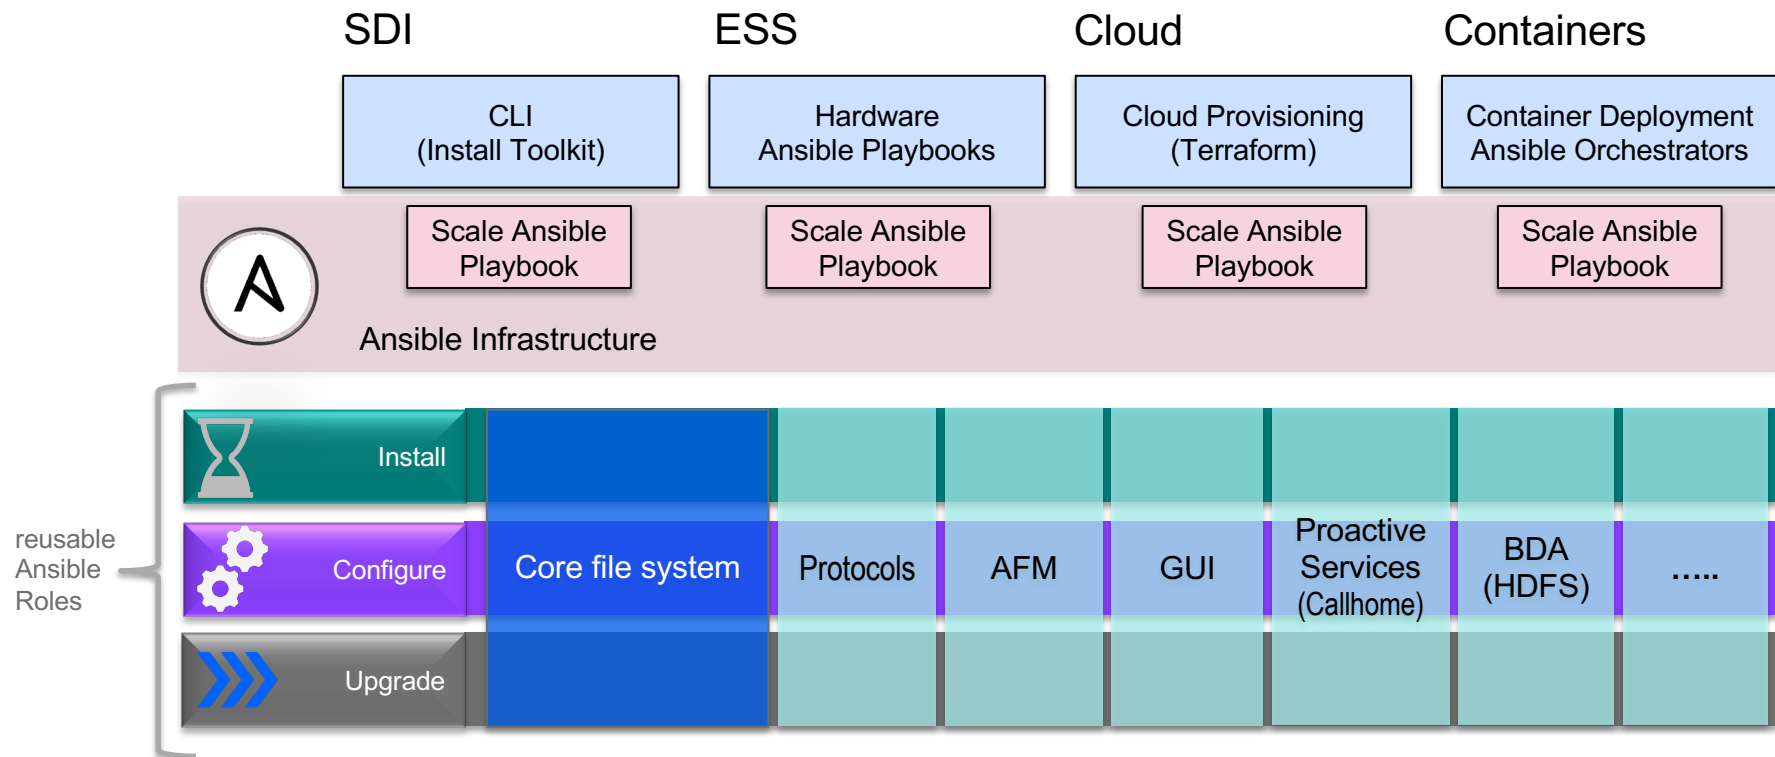

# Spectrum Scale DevOps: Strategy

## Reusable infrastructure

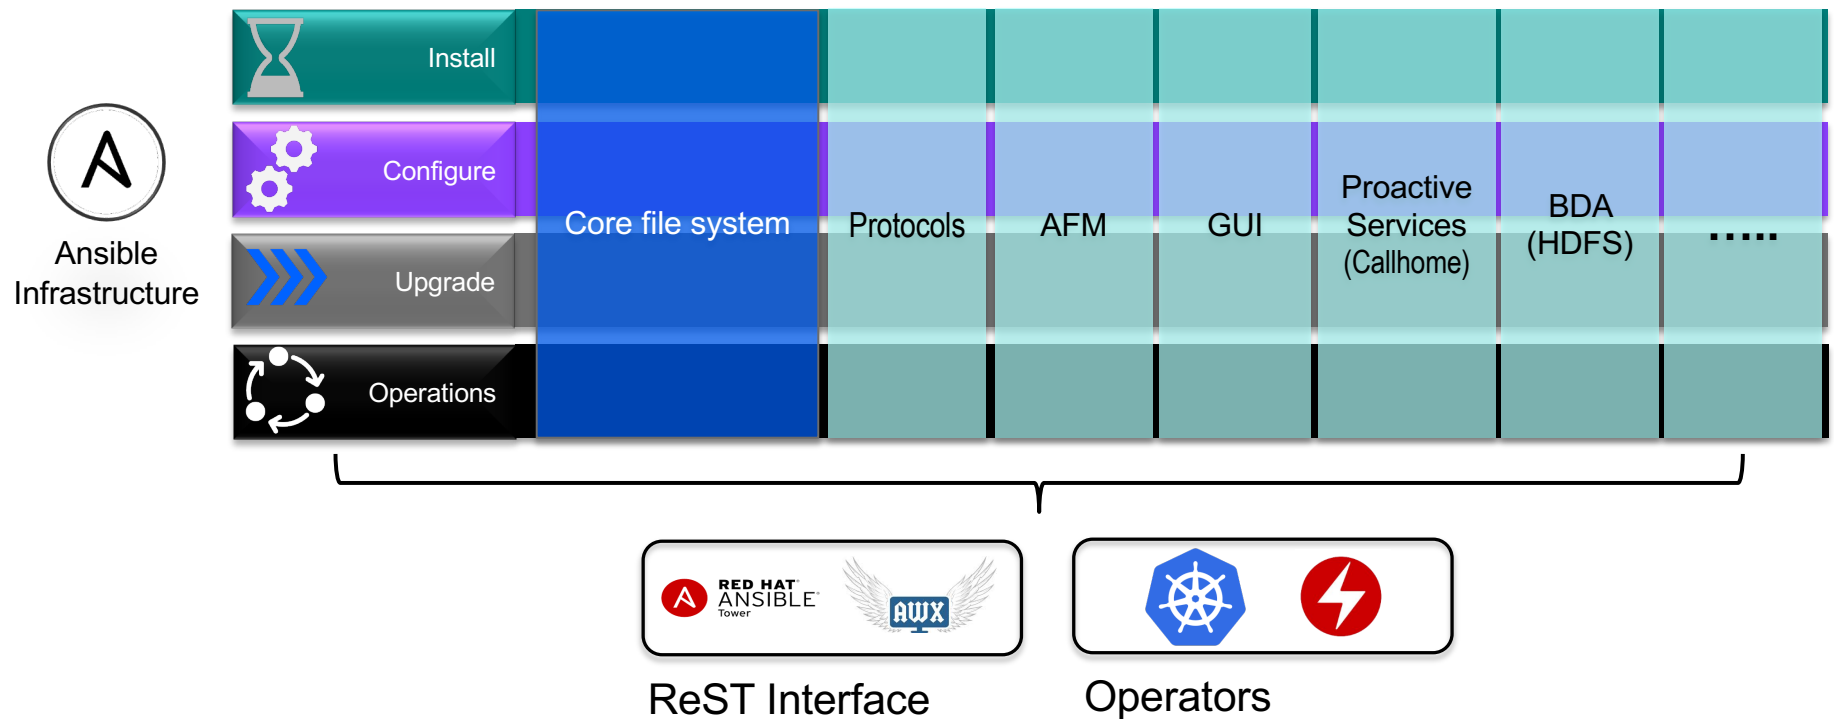

Provides installation, configuration and upgrade capabilities for all Spectrum Scale form factors

# Spectrum Scale DevOps: Strategy

## Reusable infrastructure

Extend to provide administrative commands, ready for further reuse

# Data Management Challenges in AI and Analytics

Data ingest and preparation cycle are too time consuming

Multi-source data aggregation

Silos of infrastructure for various analytics use cases

Multiple copies of same data without a single source of truth

Analytics on stale data

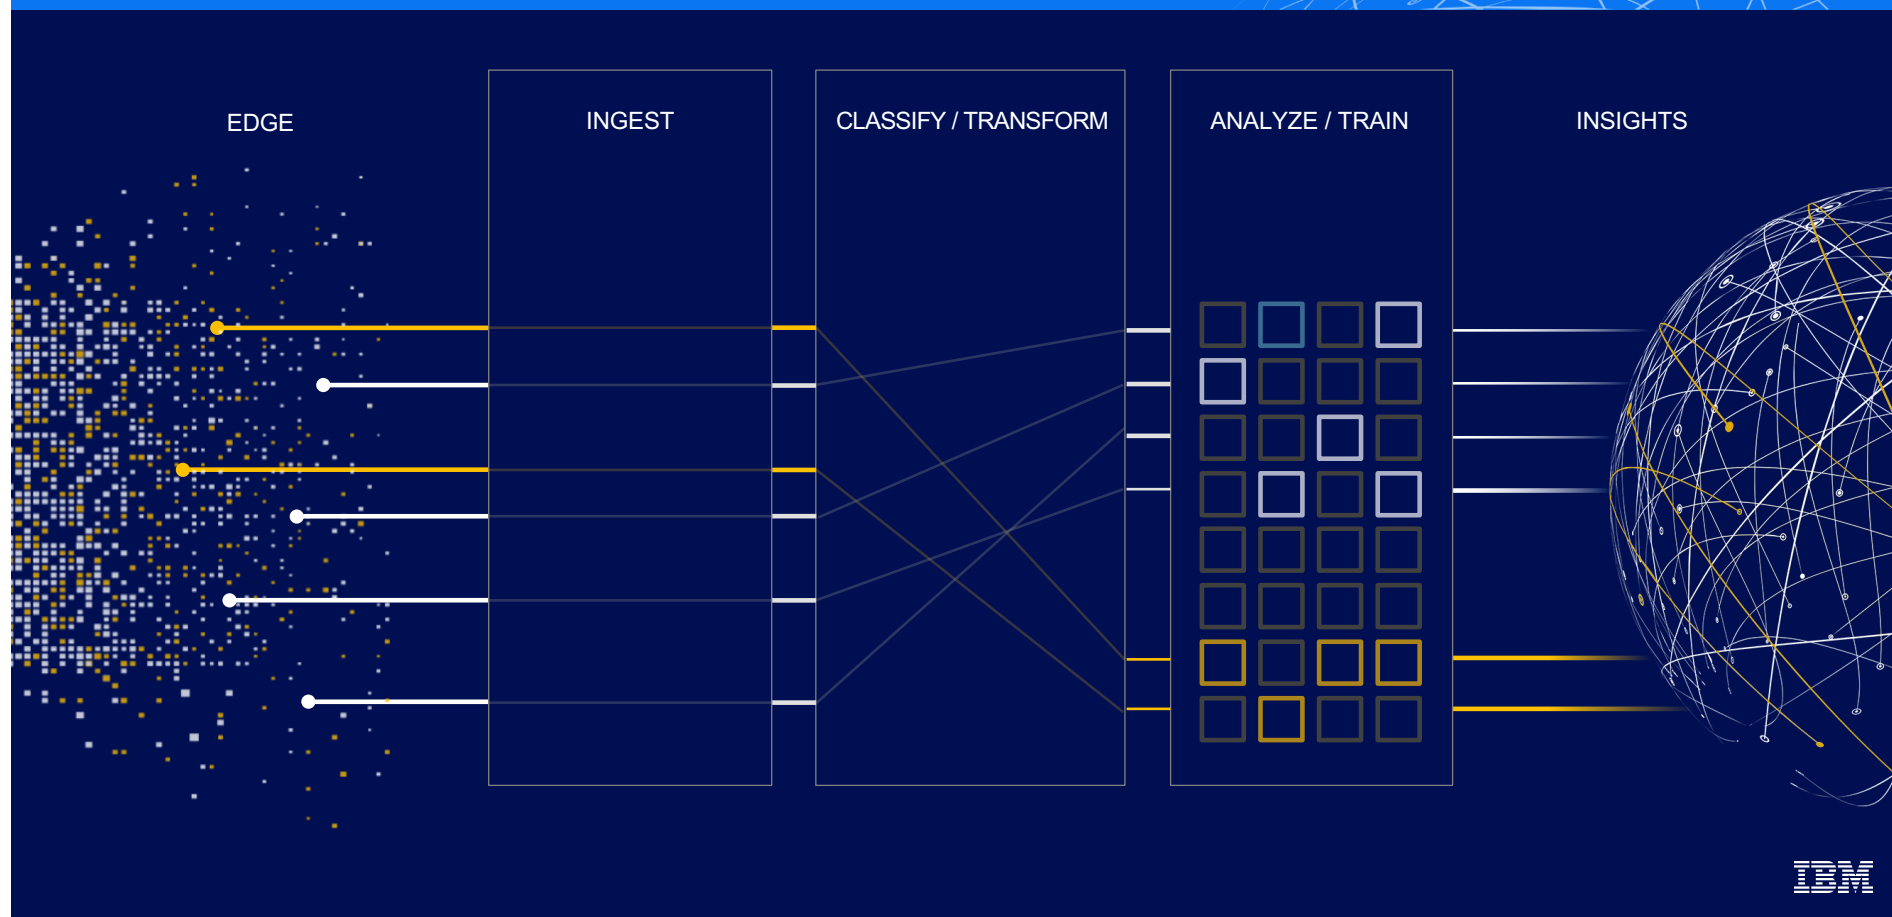

Need to securely manage and protect data provenance for repeatability

Need for global accessibility and collaboration

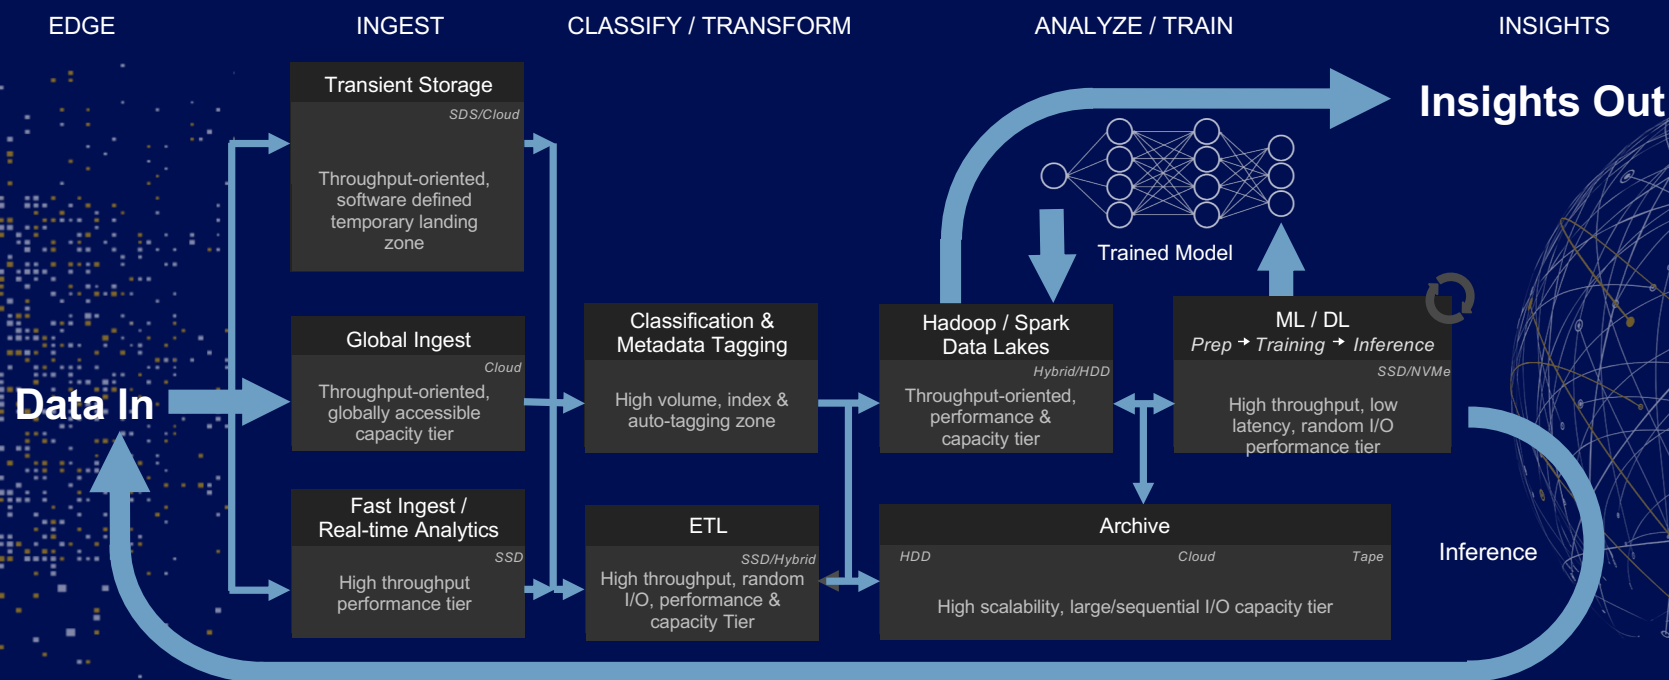

# The Goal: *Move Data from Ingest to Insights*

IBM Storage and SDI

# AI Data Pipeline

IBM Storage and SDI

1. Single name space across storage platforms
2. Global collaboration / Hybrid Multi-Cloud
3. Indexing, Auto tagging / metadata management
4. Integrated analytics platform

## Data Accelerator for AI and Analytics

# The Problem

We see:

- Customers across all verticals are creating large PB to EB data stores.
- Vast majority of data is relatively cold, but still required for periodic trend analysis.
- But AI / Analytics require high performance, low latency storage to keep expensive CPU / GPU / TPU / FPGA busy.

# The Solution: ESS 3000 for AI with DGX

**Keeping GPUs busy  
regardless of IO  
access patterns**

**Headroom for data  
centric workload  
growth**

Maximize GPU Utilization

Minimize Disk Utilization

# IBM Spectrum Scale and IBM QRadar: Threat Detection and Data Protection

## Motivation

- Attacks against businesses have almost doubled in five years, and incidents that would once have been considered extraordinary are becoming more and more commonplace.
- If Data is the 'Crown Jewel' then Storage (Spectrum Scale) is the 'Jewel Safe' – lets make it more safe.
- IBM QRadar is a leading SEIM+ which analyzes event data in real time for early detection of targeted attacks and data breaches.

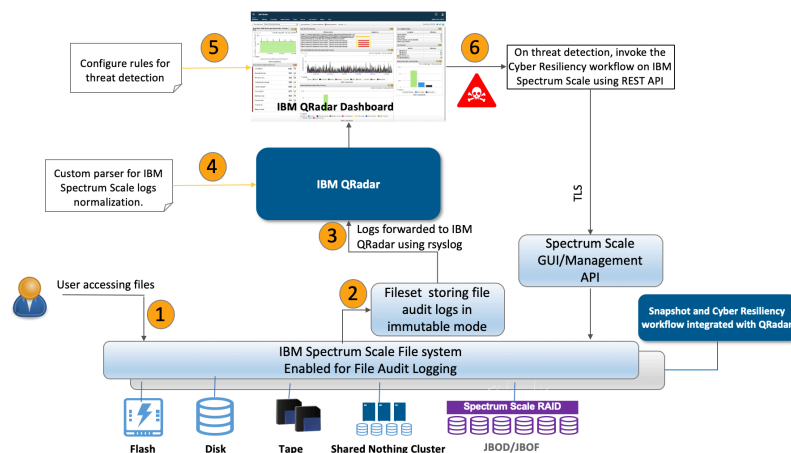

## Benefits to Customers

Integrating IBM Spectrum Scale with IBM QRadar allows:

- Customers to proactively safeguard their data residing on Spectrum Scale or be alerted on potential threats (internal / external) in real time.
- Auto trigger data protection and backup on threat detection integrating with Cyber Resiliency solution.

**Solution Brief Released (Q1 2020)**

## Solution Architecture

# Spectrum Scale Strategic Areas: Security Feature Outlook

Strategic Areas

AI & Analytics

Hybrid Cloud &  
Containers

HPC

Security & Privacy by Design

## Comprehensive Data Security

### Industry Compliance

- GDPR
- **HIPAA**
- FFIEC
- PCI-DSS
- LGPD & CCPA
- ISO 27040-2016
- NIST/FIPS

### Features

- Filesystem Encryption
- Secure Delete
- Immutability
- File Audit Log
- Kerberos (NFS, SMB)
- POSIX & NFSV4 ACL
- AD/LDAP support
- RBAC Admin (GUI)
- Admin mode central SELinux

### Advance Features

- Multi Factor Auth
- Fileset level FAL
- Live Antivirus
- Security posture in single pane of glass
- Trusted Boot
- Restricted root admin
- IPv6 (IPSEC)

### Ecosystem/Solutions

- **Secure AI**
- **Cyber Resilience**
- **Cloud Pak for Security**
- **SEIM Integration**
  - **QRadar**
  - **SPLUNK**
- IBM Secret Server
- IBM Spectrum Discover

IBM

## Next Generation Performance (part 2)

Besides Persistent Memory, Spectrum Scale is continuing to invest in high throughput, low latency storage for AI and Analytics, HPC, Cognitive and Mission Critical workloads.

PCIe Gen3 (1x) -> PCIe Gen4 (2x)-> PCIe Gen5 (4x)

Network IB/RoCE/TCP: 100 gb -> 200 gb -> 400 gb

NVMeoF creates “Composable Storage Infrastructure”

Smart NICs: TCP offload, Encryption, Compression, Erasure Encoding, QoS, vLan, dynamic flow control, etc

**Hardware performance will increase by a factor of 10 in next few years.** Spectrum Scale and ESS are making the investment required to continue its performance leadership.

PCI
